Summary

AI & Data Science graduate with hands-on production experience building end-to-end AI systems, automated data pipelines, and analytical dashboards. Expertise in Machine Learning, NLP, Deep Learning, and Computer Vision, developed through industry co-ops at Solutions by STC and KACST. Skilled at turning complex data into strategic insights using Python, SQL, Power BI, and modern ML frameworks.

Education

Bachelor of Science in Applied Information Systems - Data Science Track, King Saud University 07/2020 – 01/2026
Grade: Very Good – 9th in the Class

Professional Experience

AI & Data Intern, Solutions by STC 01/2026 – 02/2026
AI & Data & Emerging Tech Department
• Designed and deployed an interactive Power BI dashboard visualizing key business KPIs, enabling real-time, data-driven decisions for internal stakeholders.

AI & Data CO-OP, Solutions by STC 08/2025 – 02/2026
AI & Data & Emerging Tech Department
• Architected a production-level AI document processing system using LLMs and OCR, reducing manual extraction effort by ~70%.
• Built an end-to-end Automated Minutes of Meeting (MoM) pipeline using speech-to-text (Whisper) and LLMs, significantly cutting meeting documentation time.
• Developed an HR Analytics Dashboard in Python and SQL with dynamic workforce segmentation for headcount and performance analysis.
• Created an AI customer feedback chatbot using RAG, NLP, and sentiment analysis, converting unstructured feedback into product insights.

AI CO-OP, King Abdulaziz City for Science and Technology (KACST) 06/2025 – 08/2025
Visual & Predictive Analytics Department
• Executed image preprocessing workflows and trained computer vision models in PyTorch for a classified national research initiative.

Selected Projects

Saudi Labor Market Analysis 06/2026 – 06/2026
• Analyzed 1,470 job listings from Jadarat (Saudi national job portal) using Python for cleaning and EDA, and built an interactive Power BI dashboard uncovering salary trends by region, sector, and experience level.

AI-Powered Recruitment System (Graduation Project) 01/2025 – 12/2025
• Built a full-stack AI recruitment system with automated resume parsing, semantic candidate-role matching, and ML-based scoring pipelines.
• Used transformer-based NLP models for skill extraction and candidate assessment, achieving strong matching accuracy across diverse job profiles.

SmartList (SDAIA Bootcamp Project) 01/2025 – 01/2025
• Built an AI task and goal-management tool using Streamlit and Google Gemini AI.

Loan Eligibility Classification 11/2024 – 12/2024
• Applied ML classification models (Logistic Regression, Decision Tree) on the Loan Prediction dataset; identified Credit History as the strongest predictive feature.

Skills

Languages: Python, SQL, R, Java, HTML, CSS, JavaScript, PHP
AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, Prompt Engineering, Feature Engineering, Model Training & Evaluation, ML Pipelines
Frameworks: PyTorch, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, Transformers (Hugging Face)
AI Dev & Apps: Streamlit, LLM Integration, API-Based AI Solutions, Speech-to-Text (Whisper), End-to-End AI System Development
BI & Analytics: Power BI, Tableau, Advanced Excel, Data Visualization, Dashboard Design, KPI Reporting
Data Engineering: ETL Pipelines, SQL Data Management, Data Preprocessing, OCR & Document Processing
Tools: Jupyter Notebook, Git, GitHub, VS Code
Soft Skills: Problem Solving, Critical Thinking, Communication, Collaboration, Leadership, Time Management

Certificates

Certified Data Management professional (CDMP – Associate) – ☆ DAMA International - 01/2026
AI Application Building bootcamp in python – ☆ SDAIA - 01/2025
Data Science Professional – ☆ IBM - 02/2025
Applied Data Science – ☆ IBM - 02/2025
Building Transformer-Based Natural Language Processing Applications – ☆ NVIDIA - 03/2026
Design Thinking in Business: Building Promising Ventures – Tuwaiq Academy - 8/2025
AI Foundations for business – IBM - 03/2025
Advanced Excel – KSU - 02/2022
